

Galaxy Song: Eric Idle & John Du Prez

Bb
 Just remember that you're standing on a planet that's evolving
 F7
 And revolving at nine hundred miles an hour,
 F7
 That's orbiting at nineteen miles a second, so it's reckoned,
 Bb
 A sun that is the source of all our power.
 Bb
 The sun and you and me and all the stars that we can see
 G7 Cm
 Are moving at a million miles a day
 Cm (Ebm) Bb G7
 In an outer spiral arm, at forty thousand miles an hour,
 C7 F Bb
 Of the galaxy we call the 'Milky Way'.

Bb
 Our galaxy itself contains a hundred billion stars.
 F7
 It's a hundred thousand light years side to side.
 F7
 It bulges in the middle, sixteen thousand light years thick,
 Bb
 But out by us, it's just three thousand light years wide.
 Bb
 We're thirty thousand light years from galactic central point.
 G7 Cm
 We go 'round every two hundred million years,
 Cm (Ebm) Bb G7
 And our galaxy is only one of millions of billions
 C7 F Bb
 In this amazing and expanding universe.
 Bb
 The universe itself keeps on expanding and expanding
 F7
 In all of the directions it can whizz
 F7
 As fast as it can go, at the speed of light, you know,
 Bb
 Twelve million miles a minute, and that's the fastest speed there is.
 Bb
 So remember, when you're feeling very small and insecure,
 G7 Cm
 How amazingly unlikely is your birth,
 Cm (Ebm) Bb G7
 And pray that there's intelligent life somewhere up in space,
 C7 F Bb
 'Cause there's bugger all down here on Earth.
